

4.4 A Signal's Spectrum	142
Exercise 4.4.1	143
Exercise 4.4.2	144
4.5 Fourier Series Approximation of Signals	144
Exercise 4.5.1	148
4.6 Encoding Information in the Frequency Domain	149
Exercise 4.6.1	150
Exercise 4.6.2	151
4.7 Filtering Periodic Signals	152
Example 4.3	153
Exercise 4.7.1	154
4.8 Derivation of the Fourier Transform	154
Example 4.4	155
Exercise 4.8.1	156
Exercise 4.8.2	157
Example 4.5	159
Exercise 4.8.3	161
Exercise 4.8.4	161
4.9 Linear Time Invariant Systems	161
Example 4.6	162
Exercise 4.9.1	163
4.9.1 Transfer Functions	164
4.9.2 Commutative Transfer Functions	164
4.10 Modeling the Speech Signal	165
Exercise 4.10.1	167
Exercise 4.10.2	169
Exercise 4.10.3	170
4.11 Frequency Domain Problems	173
Problem 4.1: Simple Fourier Series	173
Problem 4.2: Fourier Series	174
Problem 4.3: Phase Distortion	175
Problem 4.4: Approximating Periodic Signals	176
Problem 4.5: Long, Hot Days	177
Problem 4.6: Fourier Transform Pairs	178
Problem 4.7: Duality in Fourier Transforms	178
Problem 4.8: Spectra of Pulse Sequences	179
Problem 4.10: Lowpass Filtering a Square Wave	180
Problem 4.11: Mathematics with Circuits	180
Problem 4.12: Where is that sound coming from?	181
Problem 4.13: Arrangements of Systems	182
Problem 4.14: Filtering	182
Problem 4.15: Circuits Filter!	183
Problem 4.16: Reverberation	183
Problem 4.17: Echoes in Telephone Systems	183
Problem 4.18: Effective Drug Delivery	184
Problem 4.19: Catching Speeders with Radar	184
